## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 26-39 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant states in the response dated 5/14/2002 and received 6/4/02, that support for the claim is found in the disclosure and lists various page and line numbers where these limitations can be found. The examiner disagrees for there is no figure showing the embodiment now claimed. Additionally, there is no statement in the disclosure stating that the invention is not limited to the embodiments or examples claimed or disclosed. Applicant states that support for the desiccant pouch is found on page 1 lines 14, 31 and page 2 line 5. The statements in these lines refer to the current state of the art and the disadvantages associated with desiccant pouches. The disclosure states that the matrix is preferably in sheet form (page 3, line 31) and is illustrated as such. The applicant has picked two limitations from an embodiment found on page 3 of the disclosure involving a "water vapor permeable layer" and "polymeric matrix", another two limitations "pressure sensitive adhesive layer" and "release liner" ("adhesive backing layer") found on page 5 from an embodiment which starts on page 4, line 31, and a third embodiment which starts on page 5, line 30 and includes the limitations of a "support layer" and "regenerative desiccant". The applicant states that support for the materials

used in the dependent claims can be found on pages 3-6 of the disclosure. However, these pages cover at least three separate embodiments. Consequently, the combination of limitations was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed had possession of the claimed invention.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
